

Teleprompter Display Software

TVPROMPT-LE v.4.0

For TV shows, TV news, lectures, concerts and any live event.

Tvprompt-LE offers the versatility required to be used in any professional work environment. It allows you to create Rundowns (TV Studio mode) where it is possible to move, delete, add, insert, edit, etc. On the other hand, it can also be configured as a single text (Conference Mode), or several scripts with its own text editor. Then you can perform all the necessary modifications in the text.

Script control is achieved through different input devices. It works both manual (keyboard and mouse) and remotely (foot and hand controls). These controls can operate connected by USB, Ethernet or wireless.

Tvprompt-LE is a built-in Unicode text format system, so it is compatible with texts and characters of any language.

In TV mode, the software uses different color schemes for the Rundown to identify quickly the texts that move, play, jump ... In addition, you can preview the text, edit it, move it ...

In Conference mode, you have a fully integrated text editor, which offers the possibility to modify all the text settings, as well as the size and color of the font, the background color, the text alignment and many other options.
