

TELEPROMPTER DISPLAY SOFTWARE

TVPROMPT LE v-5.0

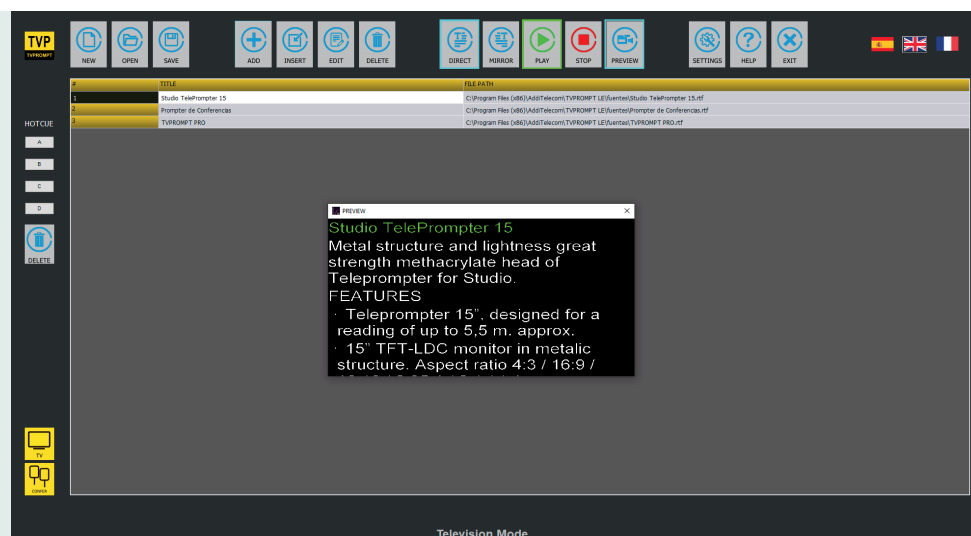

INDISPENSABLE IN TELEVISION PROGRAMS,
CONFERENCES, CONCERTS AND ANY LIVE EVENT.

TVPROMPT-LE offers all the versatility needed to be used in any professional work environment.

This software can be configured in TV Studio Mode, forming a text grid; or in Conference Mode", with single text.

The text can be modified without leaving the software, because it includes its own editor to make the necessary changes. In addition, it has been created based on Unicode format, offering compatibility with the loading of texts and characters of any language.

Offers full control of playback texts through various input devices, both in manual mode (keyboard and mouse) and remote mode (foot controls, hand controls). These controls can be operated directly via USB, Ethernet or wirelessly.

TWO WORKING MODES:

Television Mode: The software uses different color combinations in the grids to quickly and visually identify text movements, reproduction, jump, etc. Texts can be previewed, edited, moved, changed in color; they can be moved, deleted, added, inserted, edited, and so on.

Conference Mode: It has a complete integrated Text Editor, offering the possibility to modify in situ all the configuration of the text displayed on screen, as well as the size and color of the font, background color, the alignment of the text and many more options.

REAL TIME TEXT EDITING

MANAGEMENT OF MULTIPLE MONITORS

Allows to work in extended mode with 2 monitors (Control Screen and Camera Prompter).

MIRROR IMAGE INVERSION

Reverses the output image both horizontally and vertically to fit any monitor.

INTEGRATED TEXT EDITOR
